EDUCATION

AASTU, *Software engineering*
09//2024 | Addis Ababa,Ethiopia
Currently,I am a second-year Software Engineering student, dedicated to continuous learning and growth. My university offers a two-year fast-track Master's program that begins in the fifth year of study. I plan to complete this program alongside my undergraduate degree, finishing one year after my graduation in 2029, God willing.

LANGUAGES

Amharic,English,Arabic: As an Ethiopian, I am fluent in Amharic, a language I practiced extensively with my family and community. Although my schooling was English-based, I have developed strong proficiency in English as well. As a Muslim, I have also gained knowledge of Arabic through reading and understanding various Arabic texts and books.

PROJECTS

Promotion video
This project was my graduation research for the video editing class, completed as my final assignment and presented as a sample of my work.

Pc registration system

School website
As part of a group project, we developed our school website using HTML and CSS under the guidance of our teacher. This project strengthened my teamwork, web development, and problem-solving skills.

CERTIFICATES
